

Amendments to the Specification

Please add the following new paragraphs on page 9, line 20.

B1 In one embodiment, an electronic gaming apparatus is provided. The electronic gaming device comprises: a plurality of games accessible to a user; a user-actuatable input means in communication with said electronic gaming device to communicate an input signal from said user; and a game controller in communication with said user-actuatable input means, said game controller initiating and simultaneously continuing play of multiple ones of said plurality of games in response to user activation thereof.

In another embodiment, a method of playing an electronic game is provided. The method comprises: selecting a first game from a menu consisting of a plurality of games presented by an electronic gambling device; supplementing said selection of said first game by a further selection of an additional game from said menu of said plurality of games; and concurrently playing said first and said additional game.
